

Stormwater Management Special Pollution Abatement Permit

General Permit

www.knoxvilletn.gov/engineering/

(Chapter 22.5 of the Knoxville City Code)

Reviewer: Date Received: Fee: \$200 Paid on: **Expiration Date: Date of Coverage: Permit Number:** City Block#: Watershed: CLT:

SWM USE ONLY (Engineering Department)

If completing form by hand, please use black ink only. Submit information for application of a Knoxville Special Pollution Abatement Permit to comply with the following:

- A. Enter the legal or official name of the facility. Do not use colloquial name. Give the mailing address and physical location of facility.
- B. Name of contact person for permit compliance, including job title, address, and phone numbers. The contact person shall be responsible for keeping records of incidents such as significant spills of toxic pollutants or other discharges which may affect stormwater runoff quality. The contact person shall document and record all inspections and maintenance activities.
- C. For sections 1-9, include the supporting information in the box provided or attach an exhibit labeling which section it is in reference to. Provide complete data in a legible and clearly organized format.
- D. Verify that the certification on this permit is read, thoroughly understood, and signed by the appropriate persons.

A) Name of facility:			
Mailing Address of Facility:	Street		City
	State	Zip	
Physical Address of Facility:	Street		City
	State	Zip	

B)	Contact]	Information	Name:	Title:
Address:		Street		City
		State Zi	p	
Phone	e:		Fax: E-n	nail:

C) Supporting Information

1. Description of facility, nature of work performed, and type of facility.

2. Site map of facility with buildings, parking, drives, materials loading and access areas, dumpsters, type of each impervious surface, ditches, pipes, catch basins, drainage basin limits, area of facility, acreage of offsite water draining onto facility, discharge points to "Waters of the State" or "Community Waters" with name of the water or channel. This map will be a minimum scale of 1"=50'.

3. Submit a plan of instruction provided to employees at all levels within the company in methods to prevent stormwater runoff pollution. The plan shall identify periodic dates for such training and methods used. Submit a site-specific spill protection plan that deals with actual hazardous materials and emergency response equipment at the site.

4. A narrative description of significant materials (as defined by 40 CFR 122.26) that are currently or in the past have been treated, stored or disposed outside; method of onsite storage or disposal; material management practices used to minimize contact of these materials with stormwater runoff for the past three years; material loading and access area; material disposal areas, location and description of existing structural and non-structural control measures to reduce pollutants in stormwater runoff; and a description of any treatment the stormwater receives.

5. Include a record of available sampling data describing pollutants in stormwater discharges. Carefully research using historical data from previous owner/operator, government records, and investigation reports.

6. Include a preventive maintenance program that includes regular inspection and maintenance of all stormwater management devices (such as cleaning grit chambers and catch basins). Maintenance program shall also include inspecting and testing plant equipment and systems to uncover conditions that could potentially cause breakdowns or failures resulting in discharges of pollutants to surface waters or to groundwater.

7. Submit a maintenance schedule of sweeping or vacuuming of facility to prevent washout from deposited emissions laden with hydrocarbons, oxides, salts, metals, worn pavement particulates, hydrocarbons for leaks and spills, trash, debris, garbage, metal, tire particles, brake lining particles and various chemicals from the wear and deterioration of vehicles. In the event of remedial work or action, submit a cleanup schedule for debris or material storage areas.

8. Description of other ways the facility plans to implement programs to reduce the discharge of pollutants into stormwater runoff. Provide estimated quantity of stormwater flow, direction of flow, and an estimate of the types of pollutants which are likely to be present in stormwater discharges associated with industrial activity for each area of the facility. Designate each area of the facility as having high, medium or low potential for stormwater pollution and explain rationale.

9. Include plans, details and specifications that show construction of new structures to protect discharge outfalls into "Waters of the State" or into "Community Waters". Common examples include an appropriately-sized grit chamber, oil skimmer, oil/water separator, media filtration inserts, etc. Vegetative measures such as grassed swales, constructed wetlands, existing woods or a detention basin are commonly used to supplement structural measures.

D) Certification and signatures:

attached exhibits. Based on my inquiry of those individuals imi	and am familiar with the information submitted in this document and nediately responsible for obtaining the information, I believe that the re that there are significant penalties for submitting false information,
Name:(President, Owner, or Ranking Official)	Title:
Signature:	Date:
Name:(Contact Person)	Title:
Signature:	Date:
If any information changes or is subsequently found to be in erro Permit application along with new signatures and dates.	r, please resubmit necessary pages of the Special Pollution Abatement

- (a) Some facilities which are not yet constructed may not have selected a permanent contact person who will ultimately be responsible for permit compliance. In these instances, the contact person may be a technical person within the company who is generally responsible for environmental compliance issues.
- (b) The president, owner, or other ranking official who certifies this document is responsible for keeping the City of Knoxville up-to-date concerning the name of the contact person. The president, owner, or other ranking official who certifies this document is also responsible for notifying the City of Knoxville if he is no longer an official with the company.

Permit expires five years from the date of issuance, or as noted on the first page of this permit

Submit this permit application promptly to the following address:

City of Knoxville Engineering Department Stormwater Management Suite 317A, City County Building P.O. Box 1631 Knoxville, TN 37901 Telephone: (865) 215-2890 Fax: (865) 215-2631
