

Plastic Bags & Glass Ruin Our Curbside Recycling!

Plastic Films & Bags

Plastic films and plastic bags of all types are NOT recyclable because they are made of low-quality plastic that no regional manufacturer will buy to reuse. Plus, bags tangle the recycling equipment, which halts the sorting line. **All recycling should be loose and not bagged.**

Glass

Glass can only be recycled at the City's five Recycling Drop-off Centers. Do NOT put glass in your curbside cart. Materials from the curbside carts must go through the sorting line, where glass contaminates true recyclables and damages equipment. Glass breaks and mixes with debris on the line, resulting in a trash-glass product that no regional manufacturer can reuse.

Still have questions about whether a particular item is recyclable?
Visit knoxvilletn.gov/serviceandsort and look it up in our recycling search tool!
